Repetitive Motion Planning and Control of Redundant Robot Manipulators

Yunong Zhang, Zhijun Zhang

Repetitive Motion Planning and Control of Redundant Robot Manipulators Yunong Zhang, Zhijun Zhang

Repetitive Motion Planning and Control of Redundant Robot Manipulators presents four typical motion planning schemes based on optimization techniques, including the fundamental RMP scheme and its extensions. These schemes are unified as quadratic programs (QPs), which are solved by neural networks or numerical algorithms. The RMP schemes are demonstrated effectively by the simulation results based on various robotic models; the experiments applying the fundamental RMP scheme to a physical robot manipulator are also presented. As the schemes and the corresponding solvers presented in the book have solved the non-repetitive motion problems existing in redundant robot manipulators, it is of particular use in applying theoretical research based on the quadratic program for redundant robot manipulators in industrial situations. This book will be a valuable reference work for engineers, researchers, advanced undergraduate and graduate students in robotics fields.

Yunong Zhang is a professor at The School of Information Science and Technology, Sun Yat-sen University, Guangzhou, China; **Zhijun Zhang** is a research fellow working at the same institute.

From reader reviews:

Christopher Arredondo:

This book untitled Repetitive Motion Planning and Control of Redundant Robot Manipulators to be one of several books that will best seller in this year, that is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this book in the book retailer or you can order it by using online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason to you to past this publication from your list.

Melanie Finnegan:

Do you have something that you enjoy such as book? The guide lovers usually prefer to select book like comic, short story and the biggest some may be novel. Now, why not attempting Repetitive Motion Planning and Control of Redundant Robot Manipulators that give your entertainment preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the opportunity for people to know world considerably better then how they react to the world. It can't be explained constantly that reading behavior only for the geeky individual but for all of you who wants to end up being success person. So , for all you who want to start reading as your good habit, you are able to pick Repetitive Motion Planning and Control of Redundant Robot Manipulators become your own personal starter.

Homer Gardner:

Do you one of the book lovers? If so, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you never know the inside because don't determine book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not because fantastic as in the outside look likes. Maybe you answer may be Repetitive Motion Planning and Control of Redundant Robot Manipulators why because the fantastic cover that make you consider in regards to the content will not disappoint a person. The inside or content is definitely fantastic as the outside or perhaps cover. Your reading 6th sense will directly assist you to pick up this book.

Willie Thacker:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you will get it in e-book method, more simple and reachable. This kind of Repetitive Motion Planning and Control of Redundant Robot Manipulators can give you a lot of close friends because by you investigating this one book you have point that they don't and make anyone more like an interesting person. This book can be one of one step for you to get success. This e-book offer you information that possibly your friend doesn't know, by knowing more than different make you to be great folks. So , why hesitate? Let me have Repetitive Motion Planning and Control of Redundant Robot Manipulators.
