The Science of Attitudes (500 Tips)

Joel Cooper, Shane Blackman, Kyle Keller

The Science of Attitudes (500 Tips) Joel Cooper, Shane Blackman, Kyle Keller

The Science of Attitudes is the first book to integrate classic and modern research in the field of attitudes at a scholarly level. Designed primarily for advanced undergraduates and graduate students, the presentation of research will also be useful for current scholars in all disciplines who are interested in how attitudes are formed and changed. The treatment of attitudes is both thorough and unique, taking a historical approach while simultaneously highlighting contemporary views and controversies. The book traces attitudes research from the inception of scientific study following World War II to the issues and methods of research that are prominent features of today's research.

Researchers in the field of attitudes will be particularly interested in classic and modern research on the organization, structure, strength and function of attitudes. Researchers in the field of persuasion will be particularly interested in work on attitude change focusing on propositional and associative learning, metacognition and dynamic theories of dissonance, balance and reactance. The book is designed to present the integration of the properties of the attitude with the dynamic considerations of attitude change. The Science of Attitudes is also the first book on attitudes to devote entire chapters to work on implicit measurements, resistance to persuasion, and social neuroscience.

From reader reviews:

Catherine Williams:

What do you think of book? It is just for students because they're still students or the item for all people in the world, what best subject for that? Merely you can be answered for that question above. Every person has different personality and hobby per other. Don't to be compelled someone or something that they don't need do that. You must know how great and also important the book The Science of Attitudes (500 Tips). All type of book is it possible to see on many solutions. You can look for the internet sources or other social media.

Regina Rodgers:

What do you in relation to book? It is not important together with you? Or just adding material when you need something to explain what yours problem? How about your free time? Or are you busy man? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question simply because just their can do in which. It said that about e-book. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need that The Science of Attitudes (500 Tips) to read.

Karen Partain:

Your reading sixth sense will not betray you actually, why because this The Science of Attitudes (500 Tips) publication written by well-known writer we are excited for well how to make book that can be understand by anyone who else read the book. Written throughout good manner for you, leaking every ideas and producing skill only for eliminate your own personal hunger then you still doubt The Science of Attitudes (500 Tips) as good book but not only by the cover but also by content. This is one publication that can break don't judge book by its cover, so do you still needing a different sixth sense to pick this specific!?! Oh come on your looking at sixth sense already said so why you have to listening to one more sixth sense.

Henry Buford:

Is it a person who having spare time then spend it whole day by watching television programs or just laying on the bed? Do you need something new? This The Science of Attitudes (500 Tips) can be the respond to, oh how comes? It's a book you know. You are and so out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these guides have than the others?
