Algorithmic Methods in Non-Commutative Algebra: Applications to Quantum Groups (Mathematical Modelling: Theory and Applications) J.L. Bueso, José Gómez-Torrecillas, A. Verschoren

The already broad range of applications of ring theory has been enhanced in the eighties by the increasing interest in algebraic structures of considerable complexity, the so-called class of quantum groups. One of the fundamental properties of quantum groups is that they are modelled by associative coordinate rings possessing a canonical basis, which allows for the use of algorithmic structures based on Groebner bases to study them. This book develops these methods in a self-contained way, concentrating on an in-depth study of the notion of a vast class of non-commutative rings (encompassing most quantum groups), the so-called Poincaré-Birkhoff-Witt rings. We include algorithms which treat essential aspects like ideals and (bi)modules, the calculation of homological dimension and of the Gelfand-Kirillov dimension, the Hilbert-Samuel polynomial, primality tests for prime ideals, etc.

From reader reviews:

Wilma Shay:

What do you consider book? It is just for students because they're still students or it for all people in the world, what best subject for that? Merely you can be answered for that issue above. Every person has various personality and hobby for each other. Don't to be pressured someone or something that they don't want do that. You must know how great and important the book Algorithmic Methods in Non-Commutative Algebra: Applications to Quantum Groups (Mathematical Modelling: Theory and Applications). All type of book is it possible to see on many methods. You can look for the internet solutions or other social media.

Craig Chivers:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people like it. First reading a e-book will give you a lot of new info. When you read a e-book you will get new information because book is one of numerous ways to share the information as well as their idea. Second, looking at a book will make you more imaginative. When you studying a book especially fictional book the author will bring that you imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Algorithmic Methods in Non-Commutative Algebra: Applications to Quantum Groups (Mathematical Modelling: Theory and Applications), you can tells your family, friends in addition to soon about yours guide. Your knowledge can inspire average, make them reading a guide.

Helen Johnson:

Does one one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try to pick one book that you never know the inside because don't ascertain book by its include may doesn't work this is difficult job because you are scared that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer is usually Algorithmic Methods in Non-Commutative Algebra: Applications to Quantum Groups (Mathematical Modelling: Theory and Applications) why because the wonderful cover that make you consider about the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.

Blake Darden:

Reading a book to be new life style in this year; every people loves to read a book. When you go through a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, since book has a lot of information in it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, along with soon. The Algorithmic Methods in Non-Commutative Algebra: Applications to Quantum Groups (Mathematical

Modelling: Theory and Applications) offer you a new experience in studying a book.
