Kenya: A Natural Outlook: Chapter 18. Environmental Impact Assessment in Kenya (Developments in Earth Surface Processes) Elijah K. Biamah, Jacqueline Kiio, Benjamin Kogo

In Kenya, environmental impact assessment (EIA) has been used to ensure that environmental management is integrated into project planning and decision-making with a view of achieving ecologically sustainable development. Best-practice EIA identifies environmental risks, lessens resource use conflicts by promoting community participation, minimizes adverse environmental effects, informs decision-makers, and helps lay the base for environmentally sound projects. In the integration of an EIA, due considerations are made in all stages of a project, from exploration and planning through construction, operations, decommissioning, and beyond site closure. Therefore, this chapter brings out an in-depth understanding of the EIA in the Kenyan context. Some of the key issues looked into are the goals and principles of the EIA, the EIA process, public consultation and participation in environmental assessment, social dimensions in environmental assessment, and the legislative and regulatory framework for environmental management in Kenya.
