Bio-inspired Computation in Unmanned Aerial Vehicles

Haibin Duan, Pei Li

Bio-inspired Computation in Unmanned Aerial Vehicles Haibin Duan, Pei Li

Bio-inspired Computation in Unmanned Aerial Vehicles focuses on the aspects of path planning, formation control, heterogeneous cooperative control and vision-based surveillance and navigation in Unmanned Aerial Vehicles (UAVs) from the perspective of bio-inspired computation. It helps readers to gain a comprehensive understanding of control-related problems in UAVs, presenting the latest advances in bio-inspired computation.

By combining bio-inspired computation and UAV control problems, key questions are explored in depth, and each piece is content-rich while remaining accessible. With abundant illustrations of simulation work, this book links theory, algorithms and implementation procedures, demonstrating the simulation results with graphics that are intuitive without sacrificing academic rigor. Further, it pays due attention to both the conceptual framework and the implementation procedures.

The book offers a valuable resource for scientists, researchers and graduate students in the field of Control, Aerospace Technology and Astronautics, especially those interested in artificial intelligence and Unmanned Aerial Vehicles.

Professor **Haibin Duan** and Dr. **Pei Li**, both work at Beihang University (formerly Beijing University of Aeronautics & Astronautics, BUAA). Prof Duan's academic website is: <http://hbduan.buaa.edu.cn>

From reader reviews:

Anthony Vice:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled Bio-inspired Computation in Unmanned Aerial Vehicles. Try to make the book Bio-inspired Computation in Unmanned Aerial Vehicles as your buddy. It means that it can being your friend when you feel alone and beside that of course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you far more confidence because you can know almost everything by the book. So , let's make new experience and also knowledge with this book.

Marco Manuel:

As people who live in the modest era should be change about what going on or information even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe will update themselves by examining books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what one you should start with. This Bio-inspired Computation in Unmanned Aerial Vehicles is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

Clarissa Holland:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try to pick one book that you just dont know the inside because don't judge book by its handle may doesn't work the following is difficult job because you are afraid that the inside maybe not since fantastic as in the outside appear likes. Maybe you answer is usually Bio-inspired Computation in Unmanned Aerial Vehicles why because the wonderful cover that make you consider with regards to the content will not disappoint an individual. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

Debra McGregor:

A lot of guide has printed but it differs from the others. You can get it by world wide web on social media. You can choose the most effective book for you, science, witty, novel, or whatever by simply searching from it. It is known as of book Bio-inspired Computation in Unmanned Aerial Vehicles. You'll be able to your knowledge by it. Without making the printed book, it can add your knowledge and make an individual happier to read. It is most significant that, you must aware about guide. It can bring you from one destination for a other place.
