Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary

Tracy A. Lustig, Steve Olson, Disability, and Independence Forum on Aging, Board on Health Sciences Policy, Division of Behavioral and Social Sciences and Education, Institute of Medicine, National Research Council

The Institute of Medicine (IOM) and the National Research Council (NRC) have had prominent roles in discussions of aging, disability, and technology for decades. In 1978, *Aging and Medical Education* (IOM, 1978) raised national awareness of the challenges to physicians posed by the aging of the U.S. population. Thirty years later, *Retooling for an Aging America* highlighted concerns for the entire health care workforce in view of the aging of the population, including the role of technology in caring for older populations. The 1988 report *The Aging Population in the 21st Century* examined social, economic, and demographic changes among older adults, as well as many health-related topics: health promotion and disease prevention; quality of life; health care system financing and use; and the quality of care—especially long-term care. In 1991, the landmark report *Disability in America* laid out a national agenda to prevent disability and improve the lives of people with disabling conditions. The 1997 report *Enabling America: Assessing the Role of Rehabilitation Science and Engineering* examined the knowledge base of rehabilitation science and engineering and proposed ways to translate scientific findings into interventions that produce better health. And the 2007 report *The Future of Disability in America* examined progress made since the earlier reports and looked at continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities.

All these reports were produced by committees appointed in accordance with guidelines of the National Academies and met multiples times to compile and review evidence, reach consensus on conclusions and recommendations, draft a report of the committee, and then modify that draft report in response to comments from outside reviewers. The IOM and NRC have also held several workshops related to aging, disability, and technology and published summary reports, such as *Technology for Adaptive Aging* and *Grand Challenges of Our Aging Society*. The IOM and NRC also convene groups that take a different approach to issues of pressing national and international importance. Often known as forums or roundtables, these groups meet regularly to foster dialogue and confront issues of mutual interest and concern among a broad range of stakeholders. They can convene workshops, initiate cooperative projects among members, commission independently authored articles, and generate ideas for independent consensus studies.

In 2012 the IOM and NRC joined together to establish the Forum on Aging, Disability, and Independence to provide a neutral venue for broad-ranging discussions among the many stakeholders involved with aging and disability. The goals of the forum are to highlight areas in which the coordination of the aging and disability networks is strong, examine the challenges involved in aligning the aging and disability networks, explore new approaches for resolving problem areas, elevate the visibility and broaden the perspectives of stakeholders, and set the stage for future policy actions. Forum sponsors and members include federal agencies, health professional associations, private sector businesses, academics, and consumers. *Fostering Independence, Participation, and Healthy Aging Through Technology* summarizes this workshop.

From reader reviews:

Steven Parrish:

This Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary are generally reliable for you who want to be a successful person, why. The reason why of this Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary can be one of the great books you must have will be giving you more than just simple reading food but feed an individual with information that probably will shock your preceding knowledge. This book is usually handy, you can bring it everywhere you go and whenever your conditions in e-book and printed ones. Beside that this Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

Timothy Reed:

The book Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary has a lot of information on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. The writer makes some research prior to write this book. This book very easy to read you can find the point easily after scanning this book.

David George:

That e-book can make you to feel relax. This specific book Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary was bright colored and of course has pictures on there. As we know that book Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary has many kinds or category. Start from kids until adolescents. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book are usually make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.

Henrietta Belcher:

Reading a e-book make you to get more knowledge from the jawhorse. You can take knowledge and information from your book. Book is composed or printed or outlined from each source which filled update of news. With this modern era like today, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the Fostering Independence, Participation, and Healthy Aging Through Technology: Workshop Summary when you necessary it?
