## Exploring Mathematics Through Play in the Early Childhood Classroom (Early Childhood Education Series) Amy Noelle Parks

This practical book provides pre- and inservice teachers with an understanding of how math can be learned through play. The author helps teachers to recognize the mathematical learning that occurs during play, to develop strategies for mathematizing that play, and to design formal lessons that make connections between mathematics and play. Common Core State Standards are addressed throughout the text to demonstrate the ways in which play is critical to standards-based mathematics teaching, and to help teachers become more familiar with these standards. Classroom examples illustrate that, unlike most formal tasks, play offers children opportunities to solve nonroutine problems and to demonstrate a variety of mathematical ways of thinking—such as perseverance and attention to precision. This book will help put play back into the early childhood classroom where it belongs.

### Book Features:

- Makes explicit connections to play and the Common Core State Standards in Mathematics.
- Offers many examples of free play activities in which mathematics can be highlighted, as well as formal lessons that are inspired by play.
- Provides strategies for making assessments more playful, helping teachers meet increasing demands for assessment data while also reducing child stress.
- Includes highlight boxes with recommended resources, questions for reflection, key research findings, vocabulary, lesson plan templates, and more.

“This is one of those books that I wish I had written. It is smart, readable, relevant, and authentically focused on children.”

—From the Foreword by **Elizabeth Graue**, Sorenson Professor of Early Childhood Education, University of Wisconsin

“In this deceptively easy-to-read book, Amy Parks explains two things that could make a world of difference in early childhood and elementary classrooms: Mathematics isn’t something in a workbook—it’s a fascinating part of the real world; And playing in school isn’t a luxury—it’s an essential context for learning about all sorts of things, including mathematics. Through vignettes of children learning mathematics as they play, Parks helps teachers recognize their ‘answerability to the moment,’ eschewing someone else’s determination of ‘best practice’ in favor of what works with actual children eager to learn mathematics.”

—**Rebecca New**, School of Education, University of North Carolina at Chapel Hill

### **From reader reviews:**

#### **Amy Medina:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their leisure time with their family, or all their friends. Usually they accomplishing activity like watching television, planning to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Might be reading a book may be option to fill your free time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the reserve untitled Exploring Mathematics Through Play in the Early Childhood Classroom (Early Childhood Education Series) can be great book to read. May be it might be best activity to you.

#### **Donna Bradford:**

Often the book Exploring Mathematics Through Play in the Early Childhood Classroom (Early Childhood Education Series) has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research previous to write this book. That book very easy to read you can get the point easily after perusing this book.

#### **Gabrielle Ponds:**

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work the following is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer might be Exploring Mathematics Through Play in the Early Childhood Classroom (Early Childhood Education Series) why because the amazing cover that make you consider concerning the content will not disappoint an individual. The inside or content will be fantastic as the outside or maybe cover. Your reading 6th sense will directly show you to pick up this book.

#### **Patricia Miller:**

As a university student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's heart and soul or real their passion. They just do what the educator want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that reading through is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Exploring Mathematics Through Play in the Early Childhood Classroom (Early Childhood Education Series) can make you really feel more interested to read.
