Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and Emissions (Woodhead Publishing Series in Energy)

Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and Emissions (Woodhead Publishing Series in Energy)

Since its first development in the 1970s, Process Integration (PI) has become an important methodology in achieving more energy efficient processes. This pioneering handbook brings together the leading scientists and researchers currently contributing to PI development, pooling their expertise and specialist knowledge to provide readers with a comprehensive and up-to-date guide to the latest PI research and applications.

After an introduction to the principles of PI, the book reviews a wide range of process design and integration topics ranging from heat and utility systems to water, recycling, waste and hydrogen systems. The book considers Heat Integration, Mass Integration and Extended PI as well as a series of applications and case studies. Chapters address not just operating and capital costs but also equipment design and operability issues, through to buildings and supply chains.

With its distinguished editor and international team of expert contributors, Handbook of Process Integration (PI) is a standard reference work for managers and researchers in all energy-intensive industries, as well as academics with an interest in them, including those designing and managing oil refineries, petrochemical and power plants, as well as paper/pulp, steel, waste, food and drink processors.

- This pioneering handbook provides a comprehensive and up-to-date guide to the latest process integration research and applications
- Reviews a wide range of process design and integration topics ranging from heat and utility systems to water, recycling, waste and hydrogen systems
- Chapters also address equipment design and operability issues, through to buildings and supply chains

From reader reviews:

Nelson Wyatt:

Have you spare time for a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a walk, shopping, or went to the Mall. How about open as well as read a book called Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and Emissions (Woodhead Publishing Series in Energy)? Maybe it is to get best activity for you. You already know beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have various other opinion?

Mark Hernandez:

Now a day individuals who Living in the era exactly where everything reachable by talk with the internet and the resources in it can be true or not call for people to be aware of each details they get. How individuals to be smart in having any information nowadays? Of course the answer then is reading a book. Reading a book can help individuals out of this uncertainty Information particularly this Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and Emissions (Woodhead Publishing Series in Energy) book as this book offers you rich details and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you may already know.

Dustin Alvarez:

Reading a publication tends to be new life style with this era globalization. With studying you can get a lot of information that can give you benefit in your life. Having book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. Many author can inspire all their reader with their story or maybe their experience. Not only the storyplot that share in the textbooks. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors in this world always try to improve their skill in writing, they also doing some exploration before they write on their book. One of them is this Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and Emissions (Woodhead Publishing Series in Energy).

Kimberly Wheatley:

Reading a book for being new life style in this season; every people loves to learn a book. When you learn a book you can get a large amount of benefit. When you read publications, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what types of book that you have read. If you would like get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, as well as soon. The Handbook of Process Integration (PI): Minimisation of Energy and Water Use, Waste and

Emissions (Woodhead Publishing Series in Energy) will give you a new experience in reading a book.
