Thrombosis and Cancer

Thrombosis and Cancer

This text provides comprehensive and timely coverage of the current knowledge of cancer-associated thrombosis, its pathogenesis, clinical features, prevention, and therapy. It specifically addresses the relationship between hemostatic systems and cancer, thus providing a unique and much needed focus. All of the contributors are acknowledged specialists in their fields and have experience conducting large clinical trials in oncology and thrombosis. Their discussions cover all aspects of the topic, from long-term complications to cancer surgery. It will be of interest to general practitioners, internists, oncologists, hematologists, and all physicians involved in the management of cancer patients.
