— Booklist

The simplest definition of bilingual education is the use of two languages in the teaching of curriculum content in K–12 schools. There is an important difference to keep in mind between bilingual education and the study of foreign languages as school subjects: In bilingual education, two languages are used for instruction, and the goal is academic success in and through the two languages. The traditional model of foreign-language study places the emphasis on the acquisition of the languages themselves.

The field of bilingual education is dynamic and even controversial. The two volumes of this comprehensive, first-stop reference work collect and synthesize the knowledge base that has been well researched and accepted in the United States and abroad while also taking note of how this topic affects schools, research centers, legislative bodies, advocacy organizations, and families.
