## **Identifying, Assessing, and Treating Autism at School (Developmental Psychopathology at School)**

Stephen E. Brock, Shane R. Jimerson, Robin L. Hansen

As the rate of autism diagnosis continues to escalate, awareness and recognition of this developmental brain disorder – as well as a demand for services – are also mushrooming. School districts, already struggling under the weight of withering budgets and increasing enrollments, are now scrambling to strike a balance between the types of services and treatments parents want for their children and what the school system can afford to provide. Consequently, a broad cross-section of professionals and parents are searching for the means and methods by which to identify and address the wide-ranging educational needs of the children with autism spectrum disorder. *Identifying, Assessing, and Treating Autism at School* provides a one-stop resource that enables school psychologists to coordinate efforts between students and parents as well as other educators, administrators, and social services providers to determine which interventions are likely to be most effective in meeting the unique needs of children with autism. This volume, designed as a practical, easy-to-use reference for school psychologists and other educational professionals: Makes the case for why school psychologists and their colleagues need to be more prepared, willing, and able to identify and serve students with autism. Identifies the causes, prevalence, and associated conditions of autism spectrum disorders. Provides a review of screening, referral, and diagnostic assessment processes. Offers much-needed guidance on conducting psychoeducational assessments. Reviews appropriate treatments for students with autism. School psychologists, general and special educators, counselors, and social workers will find *Identifying, Assessing, and Treating Autism at School* an invaluable resource.
