Feedback Linearization of RF Power Amplifiers

J.L. Dawson, Thomas H Lee

Feedback Linearization of RF Power Amplifiers J.L. Dawson, Thomas H Lee

Improving the performance of the power amplifier is the most pressing problem facing designers of modern radio-frequency (RF) transceivers. Linearity and power efficiency of the transmit path are of utmost importance, and the power amplifier has proven to be the bottleneck for both. High linearity enables transmission at the highest data rates for a given channel bandwidth, and power efficiency prolongs battery lifetime in portable units and reduces heat dissipation in high-power transmitters. Cartesian feedback is a power amplifier linearization technique that acts to soften the tradeoff between power efficiency and linearity in power amplifiers. Despite its compelling, fundamental advantages, the technique has not enjoyed widespread acceptance because of certain implementation difficulties.

Feedback Linearization of RF Power Amplifiers introduces new techniques for overcoming the challenges faced by the designer of a Cartesian feedback system. The theory of the new techniques are described and analyzed in detail. The book culminates with the results of the first known fully integrated Cartesian feedback power amplifier system, whose design was enabled by the techniques described.

Feedback Linearization of RF Power Amplifiers is a valuable reference work for engineers in the telecommunications industry, industry researchers, academic researchers.

From reader reviews:

James Rose:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite book and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled Feedback Linearization of RF Power Amplifiers. Try to face the book Feedback Linearization of RF Power Amplifiers as your close friend. It means that it can to get your friend when you sense alone and beside regarding course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know every little thing by the book. So , let me make new experience as well as knowledge with this book.

Bernice Hicks:

Reading a reserve can be one of a lot of pastime that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a guide will give you a lot of new data. When you read a guide you will get new information since book is one of various ways to share the information or their idea. Second, reading a book will make an individual more imaginative. When you looking at a book especially hype book the author will bring you to definitely imagine the story how the character types do it anything. Third, you could share your knowledge to others. When you read this Feedback Linearization of RF Power Amplifiers, you are able to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a publication.

Ruth Aguilar:

In this age globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is Feedback Linearization of RF Power Amplifiers this guide consist a lot of the information with the condition of this world now. This book was represented how does the world has grown up. The dialect styles that writer use for explain it is easy to understand. Often the writer made some investigation when he makes this book. Here is why this book acceptable all of you.

Mary Barnett:

Many people spending their time by playing outside with friends, fun activity along with family or just watching TV all day long. You can have new activity to shell out your whole day by studying a book. Ugh, do you consider reading a book can really hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Mobile phone. Like Feedback Linearization of RF Power Amplifiers which is finding the e-book version. So , try out this book? Let's observe.
