Design to Survive: 9 Ways an IKEA Approach Can Fix Health Care and Save Lives Pat Mastors

The U.S. spends the most in the world on health care and research, yet our outcomes are among the worst in industrialized nations. Hundreds of thousands die every year from medical harm. Imagine a world where health care took a page from the IKEA furniture company---where expenses were streamlined, quality was predictable, customers participated, and everyone shared in the cost savings. Through colorful analogies, stories from families and top doctors, and the author's quest to find out what happened to her own father, *Design to Survive* serves up key strategies for patients, families and providers, with the conviction that we can do better.
