**Hacia una economía sin pobreza (Poliedros) (Spanish Edition)** Federico Guillermo Denti Casas

La Ciencia Económica debe proponer modos de organización económica con arreglo a fines últimos deseables. Se proponen en esta obra cuatro fines principales: el desarrollo tecnológico y el desarrollo sustentable, eliminar la pobreza y cuidar la libertad. Se cuestionan, asimismo, las bases de la ciencia, como ser Popper, Hayek y Friedman y se critica la economía neoliberal. Del mismo, se desarrolla y critica el marxismo como así también se describen los casos del “socialismo real” y los errores cometidos. Se proponen criterios (no recetas) para organizar una economía sin pobreza, como un primer logro. Además, se postula un sistema socialista respetuoso de la iniciativa privada, de la ecología y de las ideas del pueblo. Un mundo mejor es posible y las oportunidades actuales en América Latina deberían ser aprovechadas.
