## Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science)

The Pipeline and Hazardous Materials Safety Administration of the U.S. Department of Transportation defines hazardous materials (hazmat) as a substance or material capable of posing an unreasonable risk to health, safety, or property when transported in commerce. Hazmat accidents can result in significant impact to the population (death, injuries) and damage to the environment (destroyed or damaged buildings and infrastructure). Further, hazmat, especially explosive materials, can potentially be used by terrorists to attack civilians or to destroy critical infrastructure. This handbook provides models from Operations Research and Management Science that study various activities involving hazmat transportation: risk assessment, route planning, location decisions, evacuation planning, and emergency planning for terrorist attacks.

There are two important research areas in hazmat transportation that are widely studied in the literature: risk assessment and shipment planning. In the risk assessment area, important issues include measurement of accident probabilities and consequences in hazmat transport. Example works in the risk assessment area include modeling risk probability distribution over given areas, considering hazmat types and transport modes, and environmental conditions.

The first half of this handbook covers the two fields of risk assessment and shipment planning, while the second half of this handbook provides useful models and insights on other important issues including location problems for undesirable facilities, network interdiction, terrorist attack, and evacuation.

### **From reader reviews:**

#### **Vance Malik:**

Now a day people that Living in the era just where everything reachable by connect to the internet and the resources inside it can be true or not require people to be aware of each information they get. How individuals to be smart in obtaining any information nowadays? Of course the answer is reading a book. Looking at a book can help folks out of this uncertainty Information especially this Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science) book because this book offers you rich info and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it everbody knows.

#### **Barbara Taylor:**

This book untitled Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science) to be one of several books in which best seller in this year, that's because when you read this book you can get a lot of benefit on it. You will easily to buy that book in the book retail outlet or you can order it by way of online. The publisher of this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this book from your list.

#### **Kathryn Hebert:**

That guide can make you to feel relax. This specific book Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science) was colorful and of course has pictures on there. As we know that book Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science) has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for you and try to like reading this.

#### **Arthur Faust:**

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as studying become their hobby. You should know that reading is very important as well as book as to be the matter. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You discover good news or update about something by book. Numerous books that can you choose to adopt be your object. One of them are these claims Handbook of OR/MS Models in Hazardous Materials Transportation: 193 (International Series in Operations Research & Management Science).
