**Statistics for the Health Sciences: A Non-Mathematical Introduction** Christine Dancey, John Reidy, Richard Rowe

Statistics for the Health Sciences is a highly readable and accessible textbook on understanding statistics for the health sciences, both conceptually and via the SPSS programme. The authors give clear explanations of the concepts underlying statistical analyses and descriptions of how these analyses are applied in health science research without complex maths formulae.

The textbook takes students from the basics of research design, hypothesis testing and descriptive statistical techniques through to more advanced inferential statistical tests that health science students are likely to encounter. The strengths and weaknesses of different techniques are critically appraised throughout, and the authors emphasise how they may be used both in research and to inform best practice care in health settings.

Exercises and tips throughout the book allow students to practice using SPSS. The companion website provides further practical experience of conducting statistical analyses. Features include:

- multiple choice questions for both student and lecturer use

- full Powerpoint slides for lecturers
- practical exercises using SPSS
- additional practical exercises using SAS and R

This is an essential textbook for students studying beginner and intermediate level statistics across the health sciences.

### **From reader reviews:**

#### **Santa McNabb:**

Book is written, printed, or illustrated for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important factor to bring us around the world. Beside that you can your reading talent was fluently. A publication Statistics for the Health Sciences: A Non-Mathematical Introduction will make you to always be smarter. You can feel far more confidence if you can know about anything. But some of you think this open or reading a book make you bored. It is not make you fun. Why they are often thought like that? Have you trying to find best book or ideal book with you?

#### **Olivia Clinard:**

This Statistics for the Health Sciences: A Non-Mathematical Introduction book is just not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. This specific Statistics for the Health Sciences: A Non-Mathematical Introduction without we recognize teach the one who examining it become critical in imagining and analyzing. Don't be worry Statistics for the Health Sciences: A Non-Mathematical Introduction can bring any time you are and not make your case space or bookshelves' turn into full because you can have it inside your lovely laptop even cellphone. This Statistics for the Health Sciences: A Non-Mathematical Introduction having good arrangement in word in addition to layout, so you will not experience uninterested in reading.

#### **David Waymire:**

Do you one of people who can't read enjoyable if the sentence chained from the straightway, hold on guys that aren't like that. This Statistics for the Health Sciences: A Non-Mathematical Introduction book is readable by you who hate the straight word style. You will find the facts here are arrange for enjoyable examining experience without leaving perhaps decrease the knowledge that want to deliver to you. The writer connected with Statistics for the Health Sciences: A Non-Mathematical Introduction content conveys the idea easily to understand by lots of people. The printed and e-book are not different in the information but it just different available as it. So , do you nonetheless thinking Statistics for the Health Sciences: A Non-Mathematical Introduction is not loveable to be your top collection reading book?

#### **Barbera Champ:**

Many people spending their time by playing outside along with friends, fun activity together with family or just watching TV the entire day. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Statistics for the Health Sciences: A Non-Mathematical Introduction which is keeping the e-book version. So , why not try out this book? Let's find.
