Procrustes Problems (Oxford Statistical Science Series)

John C Gower, Garnt B Dijkstra

Procrustes Problems (Oxford Statistical Science Series) John C Gower, Garnt B Dijkstra

Procrustean methods are used to transform one set of data to represent another set of data as closely as possible. The name derives from the Greek myth where Procrustes invited passers-by in for a pleasant meal and a night's rest on a magical bed that would exactly fit any guest. He then either stretched the guest on the rack or cut off their legs to make them fit perfectly into the bed. Theseus turned the tables on Procrustes, fatally adjusting him to fit his own bed.

This text, the first monograph on Procrustes methods, unifies several strands in the literature and contains much new material. It focuses on matching two or more configurations by using orthogonal, projection and oblique axes transformations. Group-average summaries play an important part and links with other group-average methods are discussed.

This is the latest in the well-established and authoritative Oxford Statistical Science Series, which includes texts and monographs covering many topics of current research interest in pure and applied statistics. Each title has an original slant even if the material included is not specifically original. The authors are leading researchers and the topics covered will be of interest to all professional statisticians, whether they be in industry, government department or research institute.

Other books in the series include 23. W.J.Krzanowski: Principles of multivariate analysis: a user's perspective updated edition 24. J.Durbin and S.J.Koopman: Time series analysis by State Space Models 25. Peter J. Diggle, Patrick Heagerty, Kung-Yee Liang, Scott L. Zeger: Analysis of Longitudinal Data 2/e 26. J.K. Lindsey: Nonlinear Models in Medical Statistics 27. Peter J. Green, Nils L. Hjort & Sylvia Richardson: Highly Structured Stochastic Systems 28. Margaret S. Pepe: The Statistical Evaluation of Medical Tests for Classification and Prediction 29. Christopher G. Small and Jinfang Wang: Numerical Methods for Nonlinear Estimating Equations

From reader reviews:

Stephen Stover:

Do you one of people who can't read pleasurable if the sentence chained from the straightway, hold on guys this specific aren't like that. This Procrustes Problems (Oxford Statistical Science Series) book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to provide to you. The writer regarding Procrustes Problems (Oxford Statistical Science Series) content conveys thinking easily to understand by many individuals. The printed and e-book are not different in the written content but it just different by means of it. So , do you continue to thinking Procrustes Problems (Oxford Statistical Science Series) is not loveable to be your top record reading book?

Danny Exum:

Nowadays reading books become more than want or need but also work as a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book that improve your knowledge and information. The details you get based on what kind of guide you read, if you want attract knowledge just go with education and learning books but if you want really feel happy read one together with theme for entertaining like comic or novel. The actual Procrustes Problems (Oxford Statistical Science Series) is kind of publication which is giving the reader unstable experience.

Phillip Barker:

Many people spending their time period by playing outside together with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to invest your whole day by studying a book. Ugh, do you think reading a book will surely hard because you have to use the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smart phone. Like Procrustes Problems (Oxford Statistical Science Series) which is finding the e-book version. So , why not try out this book? Let's view.

Sam Current:

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you know that little person like reading or as studying become their hobby. You should know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your own teacher or lecturer. You get good news or update with regards to something by book. A substantial number of sorts of books that can you go onto be your object. One of them are these claims Procrustes Problems (Oxford Statistical Science Series).
