Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences) Dean P. Foster, Robert A. Stine, Richard P. Waterman

Preface Statistics is seldom the most eagerly anticipated course of a business student. It typically has the reputation of being a boring, complicated, and confusing mix of mathematical formulas and computers. Our goal in writing this casebook and the companion volume (Business Analysis Using Regression) was to change that impression by showing how statistics yields insights and answers interesting business questions. Rather than dwell on underlying formulas, we show how to use statistics to answer questions. Each case study begins with a business question and concludes with an answer to that question. Formulas appear only as needed to address the questions, and we focus on the insights into the problem provided by the mathematics. The mathematics serves a purpose. The material in this casebook is organized into 11 "classes" of related case studies that develop a single, key idea of statistics. The analysis of data using statistics is seldom very straightforward, and each analysis has many nuances. Part of the appeal of statistics is this richness, this blending of substantive theories and mathematics. For newcomers, however, this blend is too rich, and they are easily overwhelmed and unable to sort out the important ideas from nuances. Although later cases in these notes suggest this complexity, we do not begin that way.

From reader reviews:

Mike Greene:

The particular book Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences) has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was written by the very famous author. The writer makes some research just before write this book. This particular book very easy to read you can find the point easily after scanning this book.

Ramona Wrenn:

Playing with family in the park, coming to see the coastal world or hanging out with close friends is thing that usually you may have done when you have spare time, after that why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences), you are able to enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its identified as reading friends.

Jeffrey Bumgardner:

Don't be worry should you be afraid that this book may filled the space in your house, you may have it in e-book means, more simple and reachable. This Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences) can give you a lot of close friends because by you checking out this one book you have factor that they don't and make an individual more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that probably your friend doesn't understand, by knowing more than other make you to be great individuals. So , why hesitate? We need to have Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences).

Rita Beatty:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book had been rare? Why so many concern for the book? But any people feel that they enjoy to get reading. Some people likes reading through, not only science book but additionally novel and Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences) as well as others sources were given expertise for you. After you know how the good a book, you feel would like to read more and more. Science publication was created for teacher or maybe students especially. Those guides are helping them to increase their knowledge. In some other case, beside science e-book, any other book likes Basic Business Statistics: A Casebook (Textbooks in Matheamtical Sciences) to make your spare time far more colorful. Many types of book like this.
